

# Veterinary Clinic Tracker

## Features / Abstract:

The Veterinary Clinic Tracker is a Java-based system designed to manage pets and their owners efficiently. It allows clinic staff to record, update, and track pet information, species details, and owner contact data using an SQLite database. The system ensures organized record management and provides a simple text-based interface for CRUD operations.

## Entities:

### Pet

- id (PK)
- name
- species
- ownerName

### Owner

- id (PK)
- name
- contact
